OUR FOUNDER

Dr. Tomasz Dangel, MD, PhD

Specialist in anesthesiology and palliative care.
He worked as an anesthesiologist at the Children's Memorial Health Institute, where he focused on pediatric pain management, as well as at the Institute of Mother and Child.

An initiator of efforts to support the development of children's hospices in Central and Eastern Europe.

"*Professional palliative medicine is the art of making difficult decisions and implementing them as a team. When making treatment decisions, the patient's well-being and dignity must always come first.*"

Hospicjum dla Dzieci

OUR MISSION

Pediatric and perinatal palliative care

Fundacja
Warszawskie
Hospicjum dla Dzieci

OUR STATUTORY GOALS

Perinatal care for families anticipating the birth of a child with a life-limiting condition

We offer comprehensive support from doctors and psychologists throughout the pregnancy and after the baby's birth.

Comprehensive care for a child with a serious, incurable illness and their family

Our team supports the child and their family in the comfort of their own home where the little patient feels most safe and secure.

Support for parents and siblings during the grieving process

Hospice care does not end with a child's passing. We offer parents and siblings the chance to join bereavement support groups to help them through their grief.

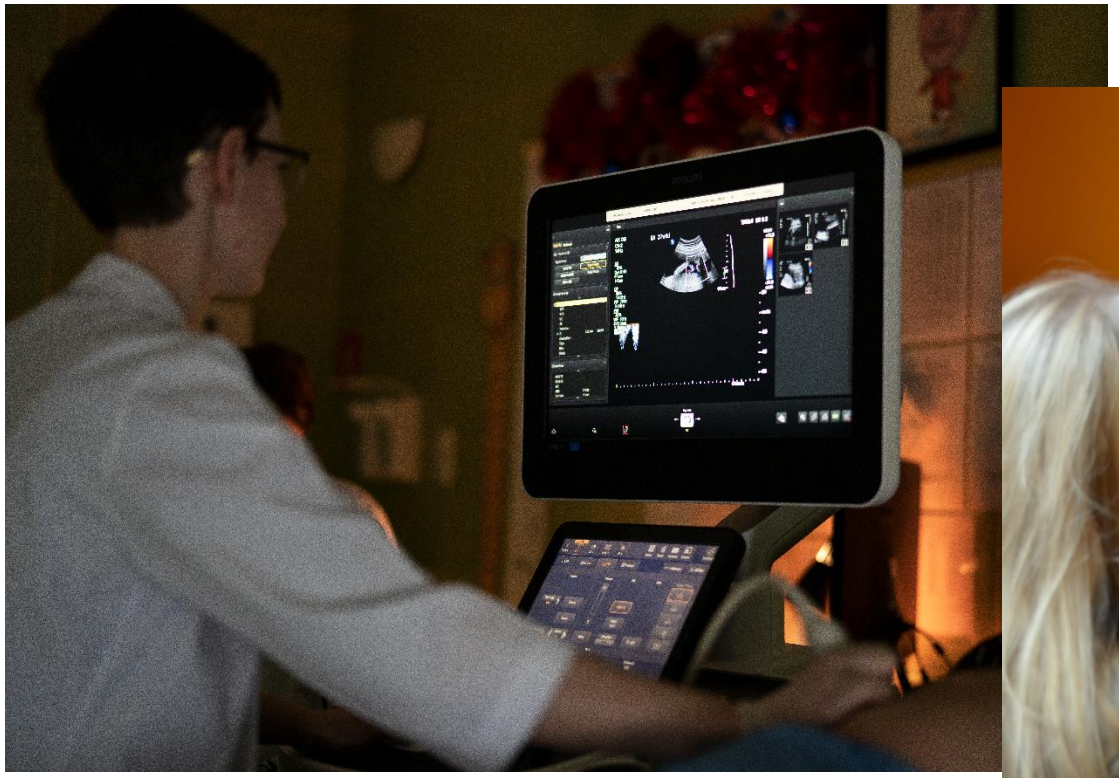
ULTRASOUND CLINIC AGATOWA & PERINATAL HOSPICE



USG Agatowa

Perinatal hospice is not a place. It is a concept of holistic care of family when the parents learn that their unborn child will live shorter life than themselves.
